GENERAL
INFORMATION

ARLU, THE REFERENCE FOR OPENING DOORS

ARLU® is the manufacturer behind the brand names argenta® and rob®. Argenta has been a leading brand in door hardware for over 100 years, but today it is mainly synonymous with invisible door systems.

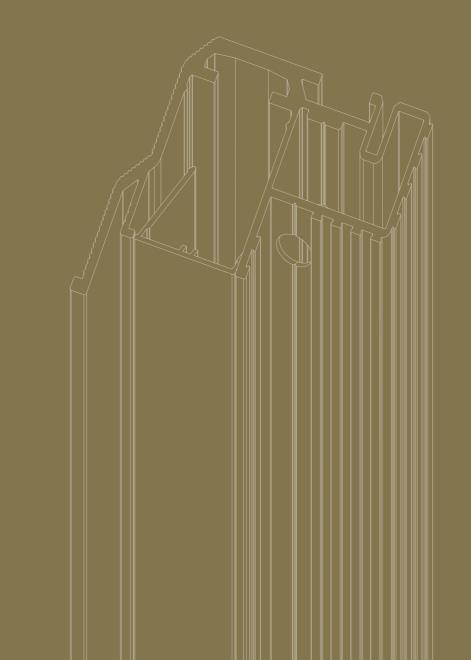

Minimalist architecture swears by clean lines and a "back to the essence" mentality. In terms of interior doors, this results in integrated door fittings, invisible integrated techniques, door frames and skirting boards for revolving, sliding and pivoting doors.

Argenta stands for a full range of sleek interior solutions.

HINGED DOORS

Thanks to an ingenious aluminium interior door frame, it is possible to achieve integrated doors in walls with a frameless appearance. With the invisiframe® the door is lined up perfectly with the wall allowing architects to create clean lines.

argenta INVISIFRAME 2.0

Maximum flexibility in invisible doorframes: that's what invisiframe® 2.0 stands for. The doorframe of invisiframe 2.0 consists of a base profile with u-profiling, in which the position of the invisible neo hinges and the lock can be freely selected using various adapters. The base frame for doors rotating to both the left and the right is the same, meaning the rotation direction of the door can still be freely decided even after the frame has been plastered in. Once the position of the adapters has been decided, the remaining space in the u-profile is simply and neatly finished using the cover profile.

argenta invisiframe 2.0

What are the benefits?

Modular

- A single frame for both left and right-hand doors
- Free choice between a left or right-hand door, even after the doorframe has been installed/finished
- Adding an extra hinge or door closer is always possible

Aesthetics

- · No visible frame around the door
- Paintable primer coating as standard (powder-coated in any RAL colour upon request)

Efficient installation

- Free installation choice in a milled reveal: before or after plastering (excl. reveals)
- The position of the finger plate and hinges can be adjusted depending on the positioning in the door leaf

Can be applied universally

- For all standard and non-standard door openings (newbuild and renovation)
- For standard flush doors
- For both brick and plasterboard walls

Little chance of cracks in plasterwork thanks to:

- Internal corner joints with permanent access to mitres
- Stable profile
- Strong and easy wall-mounting using screws or window anchors
- Special dovetail profiling for excellent PUR and plaster adhesion

Dimensions

- No difference between custom solutions and standard dimensions
- Top rail (width) and stiles (height) can easily be cut/adjusted to size

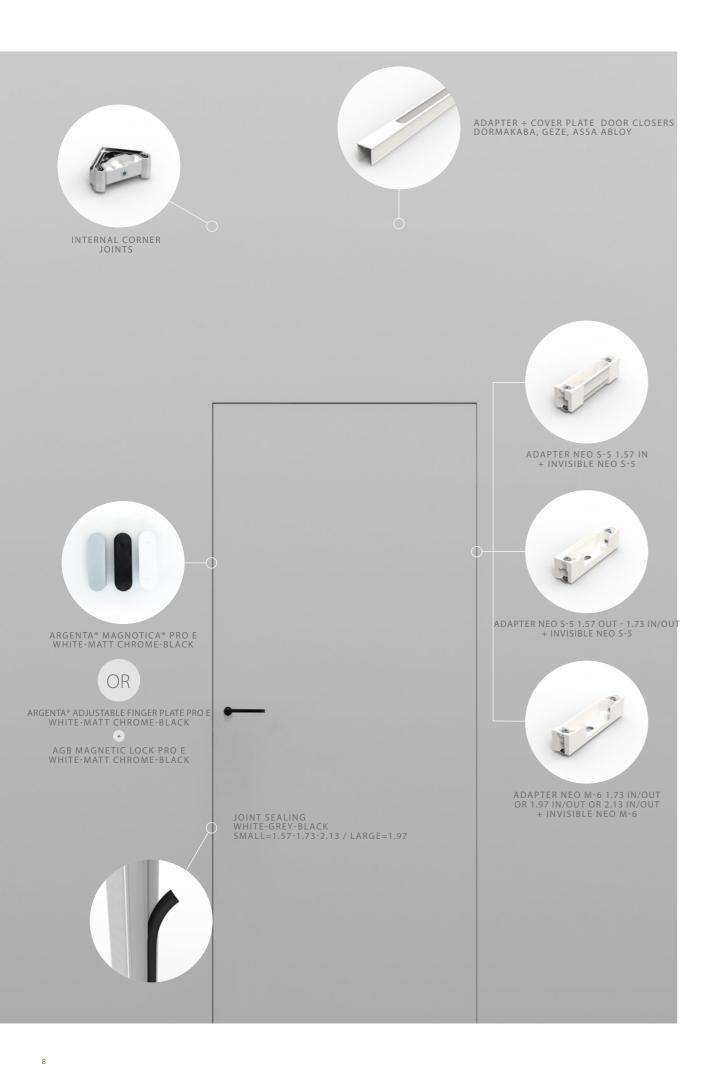

Dimensions regarding the door Dimensions door frame Width: A = X + 3.15 " (without dowels) A = X + 3.2.13 " (with dowels) Height: B = Y + 1.73 "

argenta INVISIFRAME

In contrast to traditional interior doors, invisiframe® prioritises contemporary, minimalist architecture and the greatest purity in all aspects. With its hinges and doorframe invisibly concealed, this results in the ultimate solution for sleek interiors. This way, the design of the building can get the attention it deserves, without drowning in technical aspects that often take the aesthetic upper hand.

argenta invisiframe

What are the benefits?

Aesthetics

- no visible frame around the door
- standard equipped with a primer coating (powder coated in all RAL colours on request)

Efficient installation

- option of fitting: before or after plastering
- units are supplied with special hinge caps in the cut-outs for protection during plastering

Can be applied universally

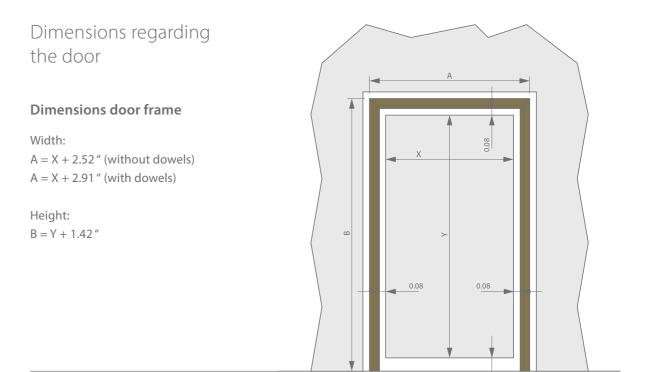

- for all standard and non-standard door openings (new buildings and renovation)
- for standard rebated doors
- for both brickwork and gypsum board walls (metal stud and CLS frames)

Little chance of cracks in plasterwork thanks to:

- sturdy frame construction (integrated corner connection)
- stable profile
- direct, sturdy and easy mounting on walls by using screws or stone anchors
- good adhesion of the plaster work against the profile thanks to the special dovetail profiling

Dimensions

- Large choice in standard dimensions
- doors at room height
- you can easily adjust the upper profile (width) by sawing/adjusting as needed

PIVOT DOORS

Also for pivot doors, ARLU® offers the perfect solution based on its invisiframe® technology. The result is a fully invisible doorframe and base that allows doors to swing open in both directions, once again with minimalism and sleek design as a fundamental feature.

argenta INVISIFRAME AX

FOR INTERIOR PIVOT DOORS
UP TO 99 LBS

Argenta® invisiframe® AX is an invisible aluminium frame for interior pivot doors that can easily, quickly and invisibly be installed and plastered. This innovative concept makes installing of a pivot door like a child's play; fitting the frame with its integrated pivot system is extremely easy, and no built-in floor system is required. Argenta invisiframe AX is the perfect solution for a dressing room door or a door between a kitchen and living room, as it can easily and quicky be pushed open, in both directions, without a door handle.

argenta INVISIFRAME AX PRO

FOR INTERIOR PIVOT DOORS
UP TO 220 LBS

Argenta® invisiframe® AX pro is an invisible aluminium frame for interior pivot doors up to 220 lbs that is ideal for heavier and more frequently used solutions. As the pivot system is integrated into the door leaf, argenta invisiframe AX Pro can be used in both newbuild and renovation projects, presenting the ideal solution for floors with under-floor heating in both circumstances. The door can be opened in both directions and has a hold position at 90°. Thanks to an active closure damper, the door always returns to its zero position. This keeps the door perfectly flush with the wall, ensuring there are no interruptions with the sleek design of the wall. Argenta invisiframe AX Pro without hold-open complies with the requirements of the

EN 1154 standard for door closers.

argenta invisiframe AX / AX pro

What are the benefits?

Aesthetics

- no visible frame around the door
- easy and hidden door assembly due to patented upper pivot system.
- virtually invisible pivot system
- generally supplied with paintable primer (other colours on request)

Efficient installation

- quick and effortless installation of the door and the frame
- the door position doesn't need to be adjusted
- for brickwork and walls with minimum wall thickness of 2.76 "

Can be applied universally

- for all standard and non-standard door openings (new buildings and renovation)
- for both brickwork and gypsum board walls (metal stud and CLS frames)

Little chance of cracks in plasterwork thanks to:

- sturdy frame construction (integrated corner connection)
- stable profile
- direct, sturdy and easy mounting on the walls by using screws or stone anchors
- good adhesion of the plaster work against the profile thanks to the special dovetail profiling

POCKET DOORS

Sliding door systems are the perfect solution when space saving is a must. As the door leaf slides into the wall, no space is lost compared to the opening angle of a swing or pivot door. Argenta®'s sliding door systems, which are based on the invisiframe® concept, allow you to enjoy timeless and minimal design for both glass and wood interior doors.

argenta INVISIFRAME S

FOR FLUSH POCKET DOORS

Invisiframe® S is a sliding door that disappears into the wall when opened, and sits perfectly flush when closed. It is the ultimate combination of the best of invisiframe DL and invisiframe SDX: the harmonious character of an invisible doorframe for pivot doors paired with the practical space-saving properties of a pocket door. The unique door hardware not only guarantees optimal and diagonal guidance for the door leaf; it also remains accessible at all times for height adjustment and to remove the door leaf if necessary. Ergonomics and top architecture combined, in other words, with the door leaf disappearing completely into the wall.

DESIGN AWARD 2020 reddot winner 2020

argenta invisiframe S

Invisiframe® S thus represents a minimalist sliding door integrated into the wall, both when open and closed! This beautiful finish is also combined with a sublime operation. The refined finish of this door system does not stand in the way of its perfect operation: Invisiframe S is equipped as standard with a softclose system to close the door softly and independently. The product has also been designed in such a way that the door leaf remains easily adjustable. Even when everything is finished, the rollers, softclose, and auto-eject can always be disassembled without damaging the wall.

What are the benefits?

Aesthetics

- When closed, the door melds seamlessly into the wall.
- 100% free passage because the door slides into the wall completely
- no visible frame around the door
- paintable primer coating as standard
- opening in wall is closed by a moving cover profile
- door closes softly and independently and is finally 'trapped' in a TPE seal
- an auto-eject is a pleasant way to hide the door away and still make it accessible

Efficient installation

• finishing with double plasterboard panels is possible (only with a wall thickness of 4.92 ")

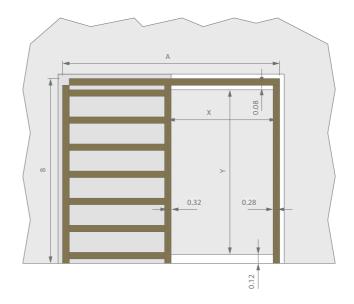

Can be applied universally

• the back of the wall can be adapted to any wall thickness.

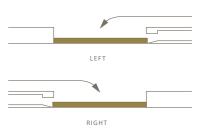

Little chance of cracks in plasterwork thanks to:

- solid construction framework (integrated corner connection)
- stable profile
- solid and easy wall mounting using screws
- special dovetail profiling for good PUR and plaster adhesion

argenta INVISIFRAME SDX

COMPLETE SOLUTION FOR POCKET DOORS

Argenta® invisiframe® SDX is a complete solution with an invisible aluminium frame for interior doors that slide into the wall, which enables you to extend the sleek design of the invisiframe range to your sliding doors in both timber and glass. Now that argenta invisiframe SDX is also available for timber sliding doors in a corner setup, a whole new world of interior design possibilities is opened up. In both assisted-living facilities or lofts, separating small spaces without having to lose any sense of spaciousness is where the skill lies. Interior doors up to 100 kg can easily be removed thanks to Manual or Auto Fix, and the removable top profile ensures the same applies to all doorstops and closers.

Aesthetics

- 100% free passage because the door completely slides into the wall
- no visible frame around the door
- standard equipped with a primer coating (powder coated in all RAL colors on request)
- minimum spacing of 0.2 " between the top of the door panel and the frame

Efficient installation

- installation of frame and door at the same time
- can be finished with double plasterboard (only for a wall thickness of 4.92 ")

Can be applied universally

- can be used for door thicknesses of 1.5 to 1.77 "
- · can be used with any type of hook lock

Little chance of cracks in plasterwork thanks to:

- sturdy frame construction (integrated corner connection)
- stable profile
- direct, sturdy and easy mounting on walls using screws or stone anchors
- good adhesion of the plaster work against the profile thanks to special dovetail profiling

INVISIBLE SKIRTING BOARDS

Doorframes, casings and hinges no longer present an obstacle thanks to invisiframe® frames. However, one final visual hurdle prevented the invisiframe concept from fully blending into the subtle interplay of lines it deserves to be part of: traditional surface-mounted skirting disturbed the harmonious balance of an invisible doorframe. Argenta®'s invisiplint presents a muchneeded solution to this by contributing to the visual purity of any interior.

argenta INVISIPLINT

Our invisiplint invisible skirting is available in flush-mounted or recessed versions, both with the same sleek and minimal result you are looking for. This system ensures walls and floors seamlessly blending into one another, without compromising on the functionality of skirting boards. Just like traditional skirtings, invisiplint protects your walls from being damaged and allows the necessary space for expanding floor coverings.

argenta invisiplint

What are the benefits?

Aesthetics

- virtually invisible skirting boards
- generally supplied with paintable primer (other colours on request)
- can perfectly be combined with the invisiframe® range to give an entire room the minimalistic look and feel that you strive for

Can be applied universally

- when used with the invisiframe type OUT, the door with the invisiplint can be opened up to 180°, something that is not possible with a classic skirting board.
- when used with the invisiframe type IN, it is impossible to use a classic skirting board. But with the invisiplint this no longers forms an issue and there is also no risk of bumping the door up to concealed skirting board.

	Thin adhesive skirting board (type 1)	Recessed skirting board drylining (type 2)	Recessed skirting board brick wall (type 3)
